9. Quick Reference Guide

INSTALLATION OF THE BC 6000m

The BC 6000m is available in 2 versions:

1. BC 6000m QUICK INSTALLATION

A. When you want to use the cigarette plug:
Connect the adapter for the cigarette lighter to the car and the other end of the cable to the speaker unit.

B. When you want to use the small mute cable:
SEE SEPARATE SHEET 'INSTALLATION SCHEME'.
Immediately to the car's electronic system via the **small mute** cable.
The wires of the **small mute** cable are listed in below table in column A and each wire should be connected to the corresponding item listed in column B.

A	B
Red wire	The + voltage of the car's power supply
Blue wire	Ignition
Black wire	The negative GND connection (-)
Brown wire	Used for Car Radio Muting (CRM) and has to be connected to the car radio (Mute)

2. BC 6000m PRO: for professional installation with sound of carkit over the car speakers

SEE SEPARATE SHEET 'INSTALLATION SCHEME'.

a. Connect the 6-pin plug and mono jack plug to the speaker unit.
b. Connect the yellow separate wire to the car radio (optional). (Used for Car Radio Muting (CRM) and has to be connected to the car radio (Mute))
c. Connect the ISO plugs to the car and the radio (maybe you will need conversion leads, which are not included)

SEE ILLUSTRATION III

The button unit (a) needs to be mounted on the dashboard.
The microphone (b) needs to be mounted close to the user's head (30 cm is optimal) and directed towards the mouth.

Installation tips:

- Make sure that the dashboard is clean and free of dust or grease before sticking the double-sided tape!
- Make sure that the unit is clean and free of dust or grease before sticking the double-sided tape!
- For optimal performance, the microphone should be located at a maximum distance of 50 cm from the driver's mouth.
- Please also carefully check the separate sheet that is included with this product.

PARTS & FUNCTIONS

SEE ILLUSTRATION II

1. GREEN BUTTON
(Pairing / Make a call / Answer a call / Redial / answer a 2nd call / Switch between 2 phone calls / Muting/un-muting the microphone)

- **Pairing:**
  You are required to pair the BC 6000m with your mobile once before using it. Each BC 6000m has a default PIN-code **0000** for pairing, which is stored in its internal memory.
  → Press and hold the Green button for 5 seconds until the LED indicators start flashing.
  → The carkit is now ready for pairing.
  → Make sure that the Bluetooth® function of your mobile phone is turned on and let your phone search for Bluetooth® devices. (Refer to the manual of your mobile phone.)
  → Select BC 6000 out of the list with found devices on your mobile phone.
  → You may be asked to enter the PIN-code to complete pairing, enter **0000** and confirm it.

  Attention!
  - To ensure automatic reconnection between the phone and the BC 6000m, we recommend setting the BC 6000m as "Authorized" in the Bluetooth® menu of your phone! Please refer to the manual of your mobile phone for more detailed information.
  - If the Bluetooth® connection is not restored automatically after disconnection, press the (+) button for 5 seconds to restore the connection manually.

- **Make a call:**
  - **Using your mobile phone's keypad**
    Enter and dial the number on the mobile phone as you normally do. Once the call has been set up, the sound will be transmitted to your carkit automatically.
  - **Using voice dialing:**
    Press the Green button 1x and you will hear a tone that indicates that you can pronounce the desired name (='***voice tag***'). → Say the voice tag. → The phone will now play the voice tag and start dialing the related phone number.
    Note: Your mobile phone needs to support voice dialing.
- **Answer a call:** Press the Green button to answer a call.
- **Redial:** Press the Green button twice. → The phone will dial the last dialed number.
- **Answer a 2nd call:** When you receive a second call, press the Green button once to hold the first call and to answer the second call.

- **Switch between 2 phone calls:** When having 2 calls on the line, press and hold the Green button for 3 seconds to switch between these 2 phone calls.
  Note: This function only works when your mobile phone service provider provides this service (check with your network provider).
- **Muting / Un-muting the microphone:**
  Press and hold the Green button for 3 seconds to mute the microphone. The white LED indicators will flash 5 times and you will hear 'DONG-DONG' tones.
  Press the Green button again for 3 seconds to un-mute the microphone again.

Attention!

- When you receive a call, please always use the green button of the BC6000m (as described above) instead of your mobile phone's green button to answer the call.
  If you do press the green button of your mobile phone, some phones (e.g. iPhone 3GS) will transmit the conversation through the phone. In this case you need to perform extra actions to transfer the conversation to the carkit (= Not handsfree calling).
- When you turn off the carkit, it can take about 20 to 40 seconds to break the connection with your mobile phone. This is due to the fact that the BC6000m is capable of pairing with 8 different mobile phones and of making a connection with 2 phones simultaneously. This last feature is called 'Multipoint' and is explained in detail on the separate sheet 'Multipoint Bluetooth'.

2. RED BUTTON
(End a call / Reject a call / Reject a 2nd call / End one of the 2 phone calls)

- **End a call:** Press the Red button to end the current call.
- **Reject a call**: Press the Red button to reject the call.
- **Reject a 2nd call:** When you receive a 2nd call, press and hold the Red button for 3 sec. to end the 2nd call.
- **End one of the 2 phone calls:** When having 2 calls on the line, press the Red button once to end the current call and to switch to the other call.

3. (+) AND (-) VOLUME BUTTONS

Press (+) to increase the volume level. Press (-) to decrease the volume level.

4. LED INDICATORS

Mode	LED indicators Red / Green Button	LED indicators +/- Volume button
Pairing mode	Flash	Flash
Standby mode (connected)	ON	OFF
Standby mode (disconnected)	OFF	ON
Talk mode	ON	ON
Mute mode	ON	FLASH 5 times (In Mute mode, you will hear 'DONG – DONG' tones)

GUARANTEE

Mr Handsfree is a registered trademark of TE-Group NV.
The mr Handsfree brand stands for superior product quality and outstanding customer service. That is why mr Handsfree warrants this product against all defects in material and workmanship for a period of **two (2) years** from the date of original purchase of the product.
The conditions of this guarantee and the extent of responsibility of mr Handsfree under this guarantee can be downloaded from our website: www.mrhandsfree.com

IMPORTANT NOTE FOR BLACKBERRY USERS!

Some Blackberry phones (not all models) automatically enable an echo suppression function in the phone. This function can decrease the carkit's sound quality and should therefore be turned off.

How?
Select 'BC6000' In your paired devices list --> Properties --> Echo Suppression --> OFF.

GB MULTIPOINT BLUETOOTH® – How to do?

– 2 phones, 1 carkit -

mr Handsfree BC6000m supports **MULTIPOINT BLUETOOTH®**, which allows you to connect and use 2 different Bluetooth® telephones at the same time with your carkit.
When 2 phones are connected to the BC6000m you always have:
• Primary phone (1st phone connected to the carkit)
• Secondary phone (2nd phone connected to the carkit)

Supported functions:
- Primary phone: Make, Answer, End & Reject calls / Redial / Voice dialing
- Secondary phone: Make, Answer, End & Reject calls

Attention!
If 1 phone is connected to the BC6000m and this phone receives a 2nd call, you will hear a BEEP.
Press the Green button once to answer the 2nd call and put the current call on hold.
If 2 phones are connected to the BC6000m (= multipoint), then the 2nd call cannot be operated from the carkit.

MULTIPOINT PAIRING PROCEDURE

► **PAIRING phone 1**
Pair the 1st phone with the BC6000m as described in chapter 'Parts & Functions / Green Button / Pairing'.
-> Connect the phone to the carkit.

► **PAIRING phone 2**
Press and hold the Green button for 5 seconds to enter pairing mode again to pair and connect with the 2nd phone.
Press and hold the (+) button for 5 seconds to reconnect the first phone.

MULTIPOINT CONNECTION PROCEDURE

When the BC6000m is switched on, it will automatically search and connect with the 2 last mobile phones that had Bluetooth® connection with the carkit.

- If only 1 phone is available: only one phone will be connected to the BC6000m. This phone will be the primary phone.
- One or both phones are shortly disconnected: the carkit will automatically reconnect.

Attention!

To ensure automatic reconnection between the phones and the BC6000m, we recommend setting the BC600m as "Authorized" in the Bluetooth® menu of your phone!

Please refer to the manual of your mobile phone for more detailed information.

If for any reason a phone will lose spontaneously the Bluetooth® connection with the BC6000m, it will automatically make a re-connection. If this re-connection fails you can always restore the Bluetooth® connection manually by pressing and holding the (+) button for 5 seconds

RECEIVING CALLS ON THE 2 PHONES

If during a telephone conversation another incoming call is received on the 2nd phone, you will hear a BEEP.

Now you CAN:

- ► **Answer the incoming call on 2nd phone**: Press the Green button to HOLD the call on the 1st phone and answer the call on the 2nd phone.
- ► **Reject the incoming call on the 2nd phone**: Press and hold the Red button to reject the call on the 2nd phone.
- ► **End current call and accept call on the 2nd phone**: Press the Red button for 3 seconds to end the current call and continue on the 2nd phone.

When you have accepted the 2nd call, you CAN:

- ► **Switch between 2 calls:** Press and hold the Green button for 3 seconds to switch between the 2 calls.
- ► **End one of the calls:** Press the Red button to end the current call and continue with the other call.
